## Winter 2025 Extended Day Activities

January 6th, 2025 - April 10th, 2025

We offer a great variety of after-school activities to Morningside Academy students! [Please review the extended day options below for Winter. You'll find the program details in the chart on the following page.](#) Note that there are no extended day classes on Fridays, during Professional Development days, conference weeks, and school closures.

To enroll, please complete the Extended Day Sign Up google form. Payment will be collected by our Accountant at the end of each quarter.

For all after school activities, we ask that students remember to pack an extra snack and reusable water bottle!

### **Monday - Yoga and Mindfulness**

Join instructor Sylwia Mazur Johnson for yoga and mindfulness. This class is filled with kid-friendly yoga poses and breathing exercises, mindfulness, games, relaxation, and a lot of fun! Children will build strength, focus, and flexibility along with kindness, compassion, and self-regulation. This class is open to all ages.

### **Tuesday - Textile Arts**

Discover the art of textiles in this engaging and hands-on class! Explore a variety of techniques including weaving, embroidery, fabric painting, and more to bring your creative visions to life. Whether you're a beginner or have experience, you'll learn the fundamentals of textile design and develop your artistic style. Through guided projects and experimentation, you'll create unique pieces while gaining an understanding of color, texture, and pattern. All materials are provided, and you'll leave with finished works and the skills to continue exploring textile arts at home. Unleash your creativity and celebrate the beauty of handmade textiles!

### **Wednesday - Minecraft Coding**

Minecraft is a fun game both kids and adults all over the world love to play! Our Minecraft Modding pathway leverages this interest to teach students core computer programming concepts and how to make their own Minecraft mods (modifications). This pathway invites students to use Computer Science concepts, harness individual creativity, and practice problem-solving skills while making their favorite game more enjoyable with personalized mods. Instructors will build on what was taught last quarter, but beginners can also join! (The cost of this class also covers the [Minecraft Education](#) license fee.)

### **Thursday - Mini Robotics**

Discover the exciting world of robotics, engineering, and coding as you work with your own robot. With provided materials (SmartKiddo robots), you'll learn engineering and programming skills while crafting programs of varying complexity that help robots move and interact with the world. No previous experience is needed; just bring your passion for innovation, problem-solving skills, and an engineering mindset. Join us for an exhilarating journey into the realm of robotics and embrace the endless possibilities of technology and creativity!
